10. Other:						

Continuation of 5. does NOT place the application in condition for allowance because: The cited portion of Subramaniam discloses "a secure connection is formed between the border server and the external client" (col. 8, lines 13-14), "the "the transmitting step is directed (or redirected) the external client to target server" (col. 9, lines 18-20). Therefore, It is inherent that a received "request including an address, the address cmprising an address of a secure server with an address of a web page concatenated thereto". Subramaniam teaches a secure connection, Munger specifically discloses encrypting IP packets consisting of messages with IP destination address before sending, Therefore, it would have been obvious to combine Subramaniam with Munger in order to keep transmitted data and the source address secure.
